

Political Cartoons Review

8000 BCE - 600 CE

Political cartoons use symbolism, caricature (exaggeration of human physical features), and other techniques to comment on events of the time period the cartoon was created.

Political cartoonists assume that educated readers have some knowledge of world history and current events.

Apply your knowledge of world history from 8000 BCE to 600 CE by writing the number of the cartoon that portrays the historical event or pattern described below. Some political cartoons may be used more than once.

Good luck and have fun!

Historical Reference

Political Cartoon number
